Profile Summary

- Followed Standard Operating Procedures (SOPs) and industry best practices, such as using **ESLint** for code formatting, employing logical code organization, meaningful naming conventions, and writing concise code to enhance system performance and efficiency.
- Created and published **common packages** to enable faster development cycles and maintain code consistency across modules.
- Designed and established a **component framework structure** for adoption in multiple modules, streamlining implementation and ensuring scalability across projects.
- Played a key role in delivering **individual modules** and **common components** by collaborating with cross-functional teams to integrate features seamlessly.
- Gathered information from the business team to understand requirements, coordinated with backend teams to map data endpoints, and updated backend APIs to optimize frontend ease, ensuring aligned and efficient delivery of product integrations.
- Gained exposure to process requirements, providing use cases for business, functional, and technical requirements.
- Analyzed user patterns and evaluated website usability from a layperson's perspective, contributing to enhanced user experience design.
- Studied and mastered **AWS fundamentals**, including key services like EC2, S3, Lambda, and CloudFormation, gaining foundational knowledge to support scalable application deployment.

Education

- Post Graduate Diploma in Advanced Computing from Centre for Development of Advanced Computing, Mumbai in 2022 with 74%
- Bachelor of Engineering (Electronics Engineering) from Shah and Anchor Kutchhi Engineering College, Mumbai in 2018

Career Timeline

Areas of Exposure

Full-Stack Development

Web Development

Agile/Scrum

UI/UX Design

Requirement Gathering & Analysis

Software Development & Support

Bug Fixes & Removal

Data Structure & Algorithms

Amazon Web Services (AWS) fundamental

Soft Skills

- Communicator
- Leadership
- Collaborator
- Positive Attitude
- Motivator
- Time Management
- Solution-oriented
- Analytical

IT Skills

Languages:

Java, JavaScript, TypeScript

Web Development:

ReactJS, ExpressJS, Redux, Redux-Sagas, UI/UX, HTML, CSS, Next.js

Database:

MySQL

Cloud & AWS

Fundamentals:

EC2, DynamoDB, S3, Load Balancer, Route 53, Elastic Beanstalk, Task Definition

Projects Undertaken

My Professional Profile *(Currently in Progress)*

Tools: Next.js, TypeScript, MUI, AWS

- Developed a **multi-page application** using **Next.js** and **TypeScript**, deployed on an **EC2 instance**, mapped with **Route 53** for domain management, and configured with a **Load Balancer** for high availability and distribution.
- Integrated a **CI/CD pipeline** to automate deployments, ensuring efficient and seamless updates and maintenance of the application.
- Leveraged **MUI** for a responsive and modern UI design, following best practices for component reusability and scalability.
- Gained experience in deploying and maintaining cloud-based applications with **AWS** for improved scalability and security.

Clickonix: An Online Electronics Store - (PGDAC Final Project) in February 2022

Tools: ReactJS, Redux, Styled-Components, ExpressJS, CSS, React-Router, NodeJS HTML, JS, Java J2EE (Spring Boot), MySQL

An online Electronics Shopping Website including:

- An online portal with 3 tier architecture with end-to-end customer journey to place order for electronics products
- Role based login to check between three roles for buyers, sellers and the admin with each role playing its own independent part
- Implementation of WebSockets to establish peer to peer connection – a chatbot was implemented with pre-fed logical responses based on customer input; also a connection between buyer and seller so as to communicate doubts regarding the product if any
- Categorization is available based on the type of product (mobiles cameras, laptops)
- Complete admin access to check the activities such as stock of products, sales, pricings, & so on

Online Bidding System – (PG Project) in January 2022

Tools: Java J2EE, MySQL

An online portal to sell products which are then bought by bidding battles. This application includes:

- A 2 tier project was done with Java as back-end and supporting Java front-end; MySQL RDBMS was used as database
- The bidding would expire in stipulated time which was calculated based on the moment object of the Moment.js library
- Automatic calculation of the latest and highest bid was done to check for valid bids with the stipulated regulations

Gaming Blog – Personal Project in January 2022

Tools: JavaScript, HTML, Bootstrap

A static website with multiple webpages including:

- Used Bootstrap libraries and classes for formatting the webpage and its layout

Work Experience

May 2023- Present

Sr. Software Developer

Zycus Infotech

Key Result Areas:

- Administered delivery and maintenance of the production codes
- Collaborated with project managers to define and track ambitious coding milestones, ensuring timely and effective releases for software projects.
- Focused on mentoring junior developers, guiding them in best practices such as modular UI component creation, and helping them grow into more autonomous roles within the team.
- Championed the use of **Git versioning** and the packaging of common components across modules to ensure smoother collaboration and consistent code quality.
- Managed the end-to-end lifecycle of individual modules, actively coordinating with PMGs to capture requirements and deliver high-quality solutions within deadlines.

Significant Accomplishments:

- Implemented reusable and scalable code solutions that enhanced server-side performance, improving data fetching speeds and overall system responsiveness.
- Mentored peers by providing guidance on modular development practices, establishing coding standards, and fostering a culture of continuous improvement within the team.

May 2022- January 2023

Software Engineer (Front-end - Web Development)

Proactive for Her, Bangalore

Key Result Areas:

- Administered delivery and maintenance of the production codes
- Supervised the development of code-work, data and its deployment
- In-charge of the working and maintenance of the Admin Panel and the Doctor Panel
- Developed end-to-end product right from creating product to watching over appointments and orders along with coupon codes & tests and referrals or prescriptions if any
- Coordinated with other engineers to evaluate and improve software and hardware interfaces

- Reviewed project specifications and designed technology solutions that met or exceeded performance expectations
- Worked with Software Development and Testing Team members to design and develop robust solutions to meet client requirements for functionality, scalability, and performance
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development

Significant Accomplishments:

- Reverse-engineered an older more static version of software through scalable codes to functionally handle the API calls
- Streamlined the website for easy debugging
- Made fetching of the codes faster on the server through reusable and scalable codes

November 2020- August 2021

Service Engineer (Team Leader)

Health ATM India, Pvt. Ltd., Mumbai

Key Result Areas:

- Conducted training and mentored team members to promote productivity, accuracy, and commitment to friendly service
- Established open and professional relationships with team members to achieve quick resolutions for various issues
- Mentored and guided employees to foster proper completion of assigned duties
- Built strong relationships with customers through positive attitude and attentive response
- Worked with team to identify areas of improvement and devised solutions based on findings
- Developed effective improvement plans in alignment with goals and specifications

September 2018- August 2020

Associate

Confederation of Indian Industry (CII), Mumbai

Key Result Areas:

- Greeted customers and offered assistance for increased customer satisfaction
- Identified customer needs and wants to enhance customer experiences and boost sales
- Worked varied hours to meet seasonal and business needs
- Utilized customer feedback to improve product offerings
- Generated sales reports and presentations for senior management
- Created solutions for customers to satisfy specific needs, quality and budget
- Followed detailed directions from management to complete daily paperwork and computer data entry
- Volunteered to help with special projects of varying degrees of complexity

Personal Details

Date of Birth: 23rd September 1995

Languages Known: English, Hindi and Marathi

Address: A/404, Sainiketan Co-Op. Housing Society, Airoli Sector 19, Navi Mumbai –Thane, 400708
